

Kiwa eLicense: the platform

The issues with physical licenses

- The holder can **lose** it or **forget** to bring it with them;
- It can be easily **forged**. This is even more easy in digital transactions;
- The **status of the license** is not always clear. When a license is suspended or revoked;
- It holds **personal data** which is not always relevant for every enforcement scenario.

Generating an eLicense is one of the steps in the process of issuing value documents/permits

Benefits

Secure and Reliable

- Increased certainty about the authenticity of the license;
- Increased certainty of license holder identity;
- Historical eLicense transactions. This means a digital papertrail that can be held for compliance reasons.

Convenient and Cost Saving

- The applicant can disclose the eLicense as soon as the license is granted;
- No new physical license needs to be issued after renewals, changes and additions;
- Immediate re-issue of eLicense in case of lost or stolen smartphone (containing e-license);
- Single sign-on for multiple eLicenses and certificates.

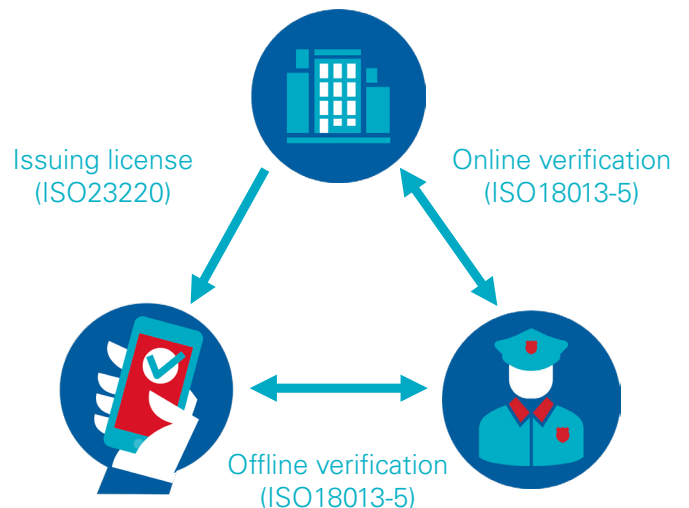

Effective Enforcement

- Real-time online verification of eLicense authenticity;
- Real-time online verification of validity status qualifications;
- Offline verification possible;
- Real-time revocation or suspension of eLicense: immediately visible in the eLicense, anywhere in the world;
- Retrospect verification of historical eLicense transactions.

eLicense: a solution based on standards

The use of international accepted standards is key for interoperability and adoption on a global scale

- We base our solution on the ISO 18013-5;
- All big tech companies support this ISO standard;
- The ISO standard is implemented by several governmental bodies.
