Testing

Inspection

Certification

## + We offer global Agri, Feed and Food certification and verification

We are Kiwa, a global leader in certification and verification, strengthened by inspection and testing activities. We have a strong footprint in Agri, Feed and Food and offer you a full spectrum of certification and verification schemes around the world, including organic and sustainability schemes.

## + We create trust

We are fully independent; through our services, we guarantee that both you and your customers taste, feed or grow safe, healthy and sustainable quality products. Thus, we create trust.

## + We understand your business

Our expertise has solid foundations - we have been operating in Agri, Feed and Food for decades. Our team of experts have vast knowledge, are fully qualified and extensively experienced in the field. You can be sure that our people understand your business.

## + We are here for you

Together with you, we design, apply, audit and monitor protocols that provide safety and assurance throughout the international food supply chain. We can also offer you digital services to support your business processes. We are always at hand to meet your requirements and to make it as friendly and efficient as possible.

**What can we do for you?**

# We create trust, so you can be trustworthy

A certificate or a quality mark is all about trust. Consumers require quality, safety and traceability of Agri, Feed and Food products sourced from suppliers who produce in a fair, responsible, sustainable and environmentally friendly way.

We offer independent global certification, verification and (production and equipment) control services to help you as a retailer, supplier, producer, grower, logistics partner or farmer build customer confidence. In close

cooperation we design, apply, audit and monitor protocols that provide assurance throughout the entire international food supply chain and also can preclude recalls, food fraud and customer dissatisfaction.

With our expertise in the field of food safety & security, animal feed, animal welfare, organic production and aquaculture, our aim is to support your business in producing, trading or handling high-quality and safe products that your customers can rely on and trust.

# From farm to fork

## + We certify throughout the supply chain

Farm to fork certification is one of our specialties. Our services include international schemes and retail and farmer group schemes. We provide a range of GFSI approved certification standards – from GLOBALG.A.P. and BRC Food to GMP+, FEMAS and FSSC 22000 – and others like IFS and ISO 22000. Plus, we audit and certify many national quality and animal welfare schemes. Furthermore, we audit logistic services, agents, brokers, storage and distribution – for example, IFS Brokers or BRC Storage & Distribution. Plus, we offer second party audits.

## + We verify throughout the supply chain

As a retailer, you perhaps have set up your own standards for suppliers to safeguard quality, safety, sustainability and health throughout the supply chain. We can verify these standards as a second party audit body, so you can be sure your suppliers adhere to them.

## + We certify organic food

Processed organic foods often have strictly regulated requirements regarding the use of organic ingredients. Many countries require producers to obtain certification based on government and/or private-defined standards in order to market food as organic. We are a specialist in the field; Kiwa is a world-renowned expert center for organic food certification.
