

# Regulatory Update

## Dominican Republic

INDOTEL has announced that, if a product has FCC-ID, Type Approval will not be required to import and commercialize the product in the country.

However, products with certain technologies will still need a license to be operated in Dominican Republic.

Hence:

- Products with Bluetooth and WLAN technologies won't require license.
- SRD (Short Range Devices) operating in the frequency bands 433.95MHz, 313MHz, 315MHz, 125kHz, 132kHz and 134kHz won't require license.
- Products with RFID 13.56MHz, RFID 800/900MHz and cell phone technologies will require license.

In order to obtain this license, the application process will be the same as the one followed until now to obtain Type Approvals.

For information regarding the need of license for technologies not listed above, please contact PCS and we will enquire with INDOTEL.
