

# Regulatory Update

## Updated regulations concerning Import Authorisation - Morocco

Following an update to the ANRT website in March 2012, official regulations concerning devices requiring import authorization have been updated accordingly.

Under previous regulations, any device (WLAN, BT, GSM, etc) containing a GPS receiver/transmitter could not follow the Type Approval route and was subject to follow the Import Authorisation process.

Under new regulations, the ANRT are now processing Approvals of WLAN/BT devices which contain a GPS receiver (receive-only).

Devices exempt from Type Approval, and where Import Authorisation is still required, are:

- 2G/3G module containing a GPS receiver
- GSM terminal
- Answering machine
- Fax
- Telephone
- Built-in laptop modem
- GPS receiver (standalone)
