India – Electronic Labelling (E-Labelling) Guidelines

Electronics and Information Technology Goods (Requirements for Compulsory Registration) Order, 2012

PCS has learned that the Bureau of Indian Standards (BIS) has published a guideline, which has reference to the electronic labelling (e-labelling) of products covered under the compulsory registration scheme of BIS.

Under this guideline, devices with an integrated, non-removable display screen are allowed to affix with a label with the required information including the standard mark electronically and physically.

The guideline applies to all devices that have an integrated, non-removable display screen. E-labelling is not a mandatory requirement. Registered manufacturers has the option of using physical labels or e-labels or both.

When the option of e-labels is selected, registered manufacturers are required to still affix a physical label to the packaging of the device.
