Regulatory Update—Argentina

Allocation of 76 to 77GHz frequency range for automotive radars

On 14th December 2016, ENACOM (Ente Nacional de Comunicaciones) published Resolution N° 8524E/2016, which allows operation in the 76 -77GHz frequency band for automotive radars.

It has been advised that a paperwork only Type Approval process for said devices can be followed, leveraging test reports to FCC standards issued by accredited laboratories. There will be no need for local testing.
