

Regulatory Update

17 December 2014

India – BIS Safety Approval Scheme Standard Change

Amendment 1 to IS 13252 (Part 1): 2010 for Information Technology Equipment Safety

The Bureau of Indian Standards (BIS) has published a guideline for implementing Amendment 1 to IS 13252 (Part 1): 2010 for Information Technology Equipment Safety.

From 3 December 2014, BIS will no longer accept test reports to IS 13252 (Part 1): 2010. All products within the scope of this standard must be tested to IS 13252 (Part 1): 2010 + A1: 2013 for any BIS registrations.

For registrations made before 3 December 2014, the following actions should be taken:

1. Send any affected models to a BIS recognised lab for additional testing as per the guideline.
2. Send letter of undertaking as per the guideline and updated test report to BIS.
3. BIS will then review the updated test report and provide a stamped photocopy of the same as acknowledgement. No further action is required from BIS.

Please note the above actions must be taken before or by 31 May 2015. Failure to do so will result in a cancellation notice to be issued to the manufacturer within 15 days and further actions including cancellation of registration to be taken depending on how the manufacturer responds to the notice.
