

Regulatory Update

Vietnam – New technical standards from 15 January 2014

The Vietnamese Type Approval Authority MIC (Ministry of Information and Communications) have started implementing the new technical standards from 15 January 2014, which will mainly affect RFID/SRD devices and radars previously approved under QCVN47:2011 standard.

A summary of the change is as below (standards in blue are the new standards which replaced QCVN47:2011):

No	Device name	Before 15-Jan-14	After 15-Jan-14
1	Wireless radio equipment using frequency modulation (FM) frequency band from 54MHz to 68 MHz	QCVN47:2011/BTTTT	QCVN70:2013/BTTTT
2	Radio equipment operating on 25MHz – 1GHz	QCVN18:2010/BTTTT QCVN47:2011/BTTTT	QCVN18:2010/BTTTT QCVN73:2013/BTTTT
3	Radio equipment operating on 1GHz – 40GHz	QCVN18:2010/BTTTT QCVN47:2011/BTTTT	QCVN18:2010/BTTTT QCVN74:2013/BTTTT
4	Data transmission equipment for low speed 5.8GHz specially used in the field of transportation	QCVN18:2010/BTTTT QCVN47:2011/BTTTT	QCVN18:2010/BTTTT QCVN75:2013/BTTTT
5	Data transmission equipment for high speed 5.8GHz specially used in the field of transportation	QCVN18:2010/BTTTT QCVN47:2011/BTTTT	QCVN18:2010/BTTTT QCVN76:2013/BTTTT

Please note products previously approved under QCVN54:2011 and QCVN65:2013 standards are not affected by this change, as QCVN54:2011 and QCVN65:2013 are still valid standards for products operating on 2.4GHz and 5GHz.

PCS is investigating whether products previously approved under QCVN47:2011 will need to be re-approved under the new standards. Details will follow once confirmation is received from Authority.
