

# Regulatory Update - Malaysia

## Malaysia – Opening of additional LTE bands

PCS have recently been informed that LTE bands 1, 8, 38 and 40 are now open in Malaysia.

Although no official announcement has been released, additional fees will be payable to the Malaysia Regulator, SIRIM, for each LTE band that is listed in the radio test report submitted along with the Type Approval application. A declaration must be submitted together with the application if the product does not support the additional LTE bands (which are mentioned in the test reports and specs) and then no additional fee is required. This has come into effect immediately.

There will be no impact on current certificates.

PCS will continue to monitor any changes and further Regulatory Update will be provided once more information becomes available.
