

# Regulatory Update

04-July-16

## Taiwan NCC (National Communications Commission) announced an updated approval scheme for Telecommunication Terminal Equipment.

On 23<sup>rd</sup> June 2016, NCC officially announced that the following telecommunication terminal devices can either follow the Declaration of Conformity (DoC) scheme or the standard Type Approval scheme that is currently being followed. This came into effect on 1<sup>st</sup> July 2016.

- Telephone
- Automatic Alarm
- Answering Machine
- Fax
- Typewriter
- Wired Remote Commander
- Key Telephone System
- Computer Integrating Phone Function
- Caller ID Terminal Devices

Under the DoC scheme, the process is simplified and costs are expected to be reduced. Similar to the standard Type Approval scheme, NCC testing and submission to NCC for assessment is still required. The NCC will then release a DoC with allocated declaration number.

In comparison to the standard NCC mark, the “z” highlighted in red below for type approval method will be “C” (for DoC scheme) rather than “T” (for Type Approval scheme).

PCS will continue to monitor any further developments and will keep customers updated once more information becomes available.
