## Regulatory Update - Chile

700MHz band is now permitted for 4G LTE

The Chilean Regulator, *Subsecretaría de Telecomunicaciones* (SUBTEL), have advised that the 700MHz band is now permitted for 4G LTE as of 18th May 2016. The Chilean licensed network providers for 700MHz LTE are Movistar (Telefónica), Entel and Claro.

There is no change to the Type Approval requirements and cellular-only devices still do not require Type Approval at SUBTEL.
