# Regulatory Update

February 2016

## Reinstatement of Type Approval Procedure - Niger

It has recently been confirmed by the Nigerien Regulator, L'Autorité de Régulation des Télécommunications et de la Poste (ARTP), that after a long period of suspension the Type Approval procedure has now been reinstated in the country.

The official text outlining the conditions of Type Approval has been published on the ARTP website however it is anticipated that the internal procedure will not be completed until April 2016; submission of Type Approval applications will therefore be on hold until this time.

PCS will continue to discuss with the ARTP in order to closely monitor this development and will provide further updates accordingly.
